

ANTREX Electronics

Electronic Components Sourcing Information

Product Reference Information

Part Number: 1N6078US/TR
Manufacturer: Microchip Technology
Package: SQ-MELF, E
Availability: Please confirm with sales

Quality & Trust

New & Original Components

Supplier verification and packaging condition review

CoC / RoHS / REACH documents available on request

Secure sourcing support for OEM / EMS projects

Note:

This PDF includes an ANTREX product reference cover page.

The original manufacturer datasheet follows from the next page.

**VOIDLESS HERMETICALLY SEALED
SURFACE MOUNT ULTRA FAST
RECOVERY GLASS POWER
RECTIFIERS**
DESCRIPTION

This "Ultrafast Recovery" rectifier diode series is ideal for high-reliability applications where a failure cannot be tolerated. These 3, 6, and 12 Amp rated rectifiers ($T_{EC} = 70^{\circ}\text{C}$) in different package sizes with working peak reverse voltages from 50 to 150 volts are hermetically sealed using voidless-glass construction and an internal "Category I" metallurgical bond. These devices are also available in axial-lead package configurations for through-hole mounting by deleting the "US" suffix (see separate data sheet for 1N6073 thru 1N6081). Microsemi also offers numerous other rectifier products to meet higher and lower current ratings with various recovery time speed requirements including standard, fast and ultrafast device types in both through-hole and surface mount packages.

APPEARANCE

IMPORTANT: For the most current data, consult MICROSEMI's website: <http://www.microsemi.com>

FEATURES

- Popular 1N6073US to 1N6081US series
- Voidless hermetically-sealed glass package
- Extremely robust construction
- Triple-layer passivation
- Internal "Category I" Metallurgical bonds
- Options for screening in accordance with MIL-PRF-19500/503 for JAN, JANTX, JANTXV, or JANS by using a MQ, MX, MV or SP prefix respectively, e.g. MX6076, MV6079, SP6081, etc.
- Axial-leaded equivalents also available (see separate data sheet for 1N6073 thru 1N6081)

APPLICATIONS / BENEFITS

- Ultrafast recovery rectifier series 50 to 150 V
- Military and other high-reliability applications
- Switching power supplies or other applications requiring extremely fast switching & low forward loss
- High forward surge current capability
- Low thermal resistance for higher power
- Controlled avalanche with peak reverse power capability
- Inherently radiation hard as described in Microsemi MicroNote 050

MAXIMUM RATINGS

- Junction Temperature: -65°C to $+155^{\circ}\text{C}$
- Storage Temperature: -65°C to $+155^{\circ}\text{C}$
- Peak Forward Surge Current @ 25°C : 35 Amps for 1N6073US-6075US, 75 Amps for 1N6076US-6078US, and 175 Amps for 1N6079US-6081US at 8.3 ms half-sine wave
- Average Rectified Forward Current (I_O) at $T_{EC} = +70^{\circ}\text{C}$:
 1N6073US thru 1N6075US: 3.0 Amps
 1N6076US thru 1N6078US: 6.0 Amps
 1N6079US thru 1N6081US: 12.0 Amps
 Average Rectified Forward Current (I_O) at $T_A = 55^{\circ}\text{C}$:
 1N6073US thru 1N6075US: 0.85 Amps
 1N6076US thru 1N6078US: 1.3 Amps
 1N6079US thru 1N6081US: 2.0 Amps
- Thermal Resistance ($R_{\theta JEC}$): 13°C/W for 1N6073US-6075US, 8.5°C/W for 1N6076US-6078US, and 5.0°C/W for 1N6079US-6081US
- Solder temperature: 260°C for 10 s (maximum)

MECHANICAL AND PACKAGING

- CASE: Hermetically sealed voidless hard glass with Tungsten slugs
- TERMINATIONS: End caps are Copper with Tin/Lead (Sn/Pb) finish. Note: Previous inventory had solid Silver end caps with Tin/Lead finish.
- MARKING: None
- POLARITY: Cathode indicated by band
- Tape & Reel option: Standard per EIA-481-B
- Weight: 1N6073 thru 1N6075: 193 mg
 1N6076 thru 1N6078: 539 mg
 1N6079 thru 1N6081: 1100 mg
- See package dimensions and recommended pad layouts on last page for all three package sizes

ELECTRICAL CHARACTERISTICS @25°C unless otherwise specified

*NOTE: $I_F = 0.5 A$, $I_{RM} = 1.0 A$, and $I_{R(REC)} = 0.25 A$

SYMBOLS & DEFINITIONS

Symbol	Definition
V_{BR}	Minimum Breakdown Voltage: The minimum voltage the device will exhibit at a specified current.
V_{RWM}	Working Peak Reverse Voltage: The maximum peak voltage that can be applied over the operating temperature range.
V_F	Maximum Forward Voltage: The maximum forward voltage the device will exhibit at a specified current.
I_R	Maximum Leakage Current: The maximum leakage current that will flow at the specified voltage and temperature.
t_{rr}	Reverse Recovery Time: The time interval between the instant the current passes through zero when changing from the forward direction to the reverse direction and a specified recovery decay point after a peak reverse current is reached.

PACKAGE DIMENSIONS
PACKAGE A (1N6073US thru 1N6075US)

NOTE: This Package Outline has also previously been identified as "D-5A"

	INCHES		mm	
	MIN	MAX	MIN	MAX
BD	.097	.103	2.46	2.62
BL	.185	.200	4.70	5.08
ECT	.019	.028	0.48	0.71
S	.003	---	0.08	---

PAD LAYOUT

	INCHES	mm
A	0.246	6.25
B	0.067	1.70
C	0.105	2.67

Note: If mounting requires adhesive separate from the solder, an additional 0.060 inch diameter contact may be placed in the center between the pads as an optional spot for cement.

PACKAGE E (1N6076US thru 1N6078US)

NOTE: DIMENSIONS IN INCHES [MM]

E-MELF-PKG (D-5B)

Note: If mounting requires adhesive separate from the solder, an additional 0.080 inch diameter contact may be placed in the center between the pads as an optional spot for cement as shown in the pad layout.

PACKAGE G (1N6079US thru 1N6081US)

NOTE: DIMENSIONS IN INCHES [MM]

G-MELF-PKG (D-5C)

Note: If mounting requires adhesive separate from the solder, an additional 0.090 inch diameter contact may be placed in the center between the pads as an optional spot for cement as shown in the pad layout.
